Education

B.Tech in Computer Science with specialization in AI & Robotics,
Vellore Institute of Technology – Chennai

July 2021 – April 2025

- CGPA: 8.12

Experience

Intern (Networking Engineer), SmartLeaven Technologies Pvt Ltd – Pune

Aug 2023 – Oct 2023

- Collaborated with industry-leading technologies like **Modbus TCP/IP** and **OPC UA** to streamline data exchange and real-time monitoring in industrial systems. Created and managed robust communication gateways for fast, bidirectional data transfers between Modbus TCP/IP devices, along with an OPC UA Server connection.

Projects

India General Election Results 2024 – SQL Power BI

- Created a thorough Power BI dashboard that shows the results of the 2024 Indian General Election at the party alliance, state, and constituency levels. NDA, I.N.D.I.A., and other alliances are being compared in real time using DAX measures, slicers, and drill-through filters. Incorporated several chart types, such as maps, bar charts, doughnut charts, and KPIs, to offer lucid insights into voter trends, party performance, and seat distribution. Interactive state- and constituency-level breakdowns that highlight important data like vote share, runner-up analysis, and demographics have improved usability.

Spotify Data Analysis Dashboard– Power BI

- Spotify listening data was analysed using an interactive Power BI dashboard that tracked key performance indicators (KPIs) such as the number of albums (7.3K), artists (3.8K), and tracks played (12.7K). Heatmaps, trend charts, and scatter plots were used to visualise listening patterns (average listening time vs. track frequency). uncovered trends in user engagement by deriving insights on top-performing albums, artists, and tracks, peak listening hours, and platform usage.

Pizza Sales Data Analysis Dashboard - SQL Excel

- KPIs such as Total Revenue (817K), Average Order Value (38.3), and Total Pizzas Sold (49K) were computed using an interactive dashboard designed to analyse pizza sales data. Excel was used for visualisations (daily/hourly trends, sales by category size, best/worst sellers), and SQL was used for data extraction and aggregation. gathered information on top-performing categories, customer preferences, and peak sales times to aid in business decision-making.

Bank Loan Report Dashboard - Excel

- Created an interactive dashboard with key performance indicators (KPIs) like the total number of loan applications (38.6K), the amount funded (435.8M), the amount received (473.1M), and the average interest rate (11.6). divided up loans into Good (86.2). Monthly trends, regional lending, loan term analysis, length of employment for borrowers, loan purpose, and the impact of home ownership are all represented in the built visualisations. offered practical advice on how to enhance risk assessment, customer profiling, and lending tactics.

Skills

Programming Languages: SQL, Python, Java, JS

Tools & Technologies: Excel, Power BI, Tableau, Dashboards

Concepts: OOPS, DBMS, OS, CN
