Education

B.Tech in Computer Science with specialization in AI & Robotics,
Vellore Institute of Technology – Chennai

July 2021 – April 2025

- CGPA: 8.12

Experience

Intern (Networking Engineer), SmartLeaven Technologies Pvt Ltd – Pune

Aug 2023 – Oct 2023

- Collaborated with industry-leading technologies like **Modbus TCP/IP and OPC UA** to streamline data exchange and real-time monitoring in industrial systems. Created and managed robust communication gateways for fast, bidirectional data transfers between Modbus TCP/IP devices, along with an OPC UA Server connection.

Projects

Malware Detection using CNN, Federated Learning PTQ

- **Defined the project scope to design a privacy-preserving malware detection system for IoT devices.** Implemented **Federated Learning (PySyft)** for **system integration across decentralized clients**, ensuring data privacy. Applied **Post-Training Quantization (PTQ)** to **optimize model size and automate edge deployment**, achieving high accuracy with reduced memory footprint. Conducted **verification & validation of CNN-based classifiers** on the MallImg dataset, ensuring real-time malware classification performance.

Emotional Analysis of Audio

- Translated **user and business requirements** into a **deep learning-based emotion recognition product**. Preprocessed and augmented audio datasets (RAVDESS, TESS, CREMA-D, SAVEE) to build a **balanced dataset** for robust model training. Extracted audio features with **Librosa** and trained **CNN + LSTM** models, achieving **85.5% accuracy in classification**. Conducted **model validation and integration testing** to ensure system reliability across multiple datasets.

Spotify Data Analysis Dashboard – Power BI

- Analyzed **user engagement requirements** and designed a **data-driven dashboard** to track key KPIs (albums, artists, tracks, listening time). **Built an interactive Power BI system with automated visualizations** (heatmaps, trend charts, scatter plots) to uncover usage trends. Translated data insights into **high-level business requirements**, such as identifying peak listening hours, top-performing artists, and platform preferences. Conducted **periodic reviews** of data pipelines to ensure accuracy, scalability, and integration with user requirements.

Pizza Sales Data Analysis Dashboard (SQL Excel)

- Defined project scope with business stakeholders to measure **sales performance KPIs** (Total Revenue: 817K, Avg. Order Value: 38.3, Total Pizzas Sold: 49K). Built **SQL-based ETL pipelines** for data extraction and aggregation, followed by **Excel-based visualization and automation**. Designed dashboards with **system integration of sales categories, customer preferences, and time-based trends, driving actionable insights**. Validated outputs through requirement checks and verification, ensuring data-driven decision support for business teams.

Skills

Programming Languages: Python, SQL, Java, JS

Tools & Technologies: Numpy, Pandas, Seaborn, Matplotlib, Sklearn, Tensorflow, Excel, Power BI, Tableau

Concepts: OOPS, DBMS, OS, CN
