Education

B.Tech in Computer Science with specialization in AI & Robotics,
Vellore Institute of Technology – Chennai

July 2021 – April 2025

- CGPA: 8.12

Experience

Intern (Networking Engineer), SmartLeaven Technologies Pvt Ltd – Pune

Aug 2023 – Oct 2023

- Collaborated with industry-leading technologies like **Modbus TCP/IP and OPC UA** to streamline data exchange and real-time monitoring in industrial systems. Created and managed robust communication gateways for fast, bidirectional data transfers between Modbus TCP/IP devices, along with an OPC UA Server connection.

Projects

Online Food Delivery Web App

- The full-stack food delivery app was developed using the MERN stack, including MongoDB, Express.js, React.js and Node.js. The app features a responsive front-end, RESTful APIs, secure user authentication, and real-time order tracking. The application was deployed using MongoDB, with payment processing integrated using UPI features for delivery tracking.

E-Commerce Web App

- Translated React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Stripe, Razorpay. Built a full-stack e-commerce platform with user authentication, product management, and cart features. Integrated payments using Cash on Delivery, Stripe, and Razorpay. Used JWT for secure APIs and MongoDB for the database.

Jivhala Motors– Vehicle Management System

- Analyzed Built a full-stack web application for managing second-hand vehicle inventory using React.js, Node.js, Express.js and MongoDB. The system features secure JWT-based authentication, vehicle in/out tracking, dynamic search, swipe-to-delete functionality, and user profile management. Integrated image uploads for vehicles and users via cloud storage, utilized Context API for efficient state management, and deployed the application on Vercel (frontend) and Render (backend).

Malware Detection using CNN, Federated Learning PTQ

- Designed a privacy-preserving malware detection system using CNNs on the Mallmg dataset. Implemented Federated Learning via PySyft to train across decentralized clients and applied Post-Training Quantization to optimize the model for edge deployment on IoT devices. Achieved high accuracy with reduced model size, ideal for real-time malware classification

Skills

Programming Languages: Java, JS, Python, SQL

Tools & Technologies: React, Tailwind CSS, Bootstrap, jQuery, Node.js, REST APIs, Git, GitHub,

Concepts: OOPS, DBMS, OS, CN
